SELF-ADHESIVE BUMPERS

PAGE 7-12

FCI carries a full line of self-adhesive bumpers for every application. Our peel resistant technology creates a long lasting bond to almost any clean, dry surface. These bumpers are abrasion and skid resistant and will not mark, scratch or stain almost any surface. The adhesive is engineered to not harden or break over time. Available in clear, black or brown on either sheets or rolls.

TEFLON GLIDES

PAGE 13-18

FCI has a complete line of 'PTFE' slider glides designed to easily glide over almost any surface. This material is one of the slipperiest substances ever developed and has one of the lowest coefficients of friction of any solid material.

PTFE is completely unaffected by outdoor weathering and will operate in extremely high and low temperatures (-240°C to +260°C).

FELT PADS

PAGE 19-22

FCI has self-adhesive felt pads for every application. Designed specifically to protect hardwood floors and furniture, these pads come in a multitude of shapes and sizes and can be supplied on both sheets and rolls. Our long lasting felt is available in various materials such as fiberfloss, wool, EVA, heavy duty as well as cork. These pads are available in black, white, grey, brown and beige and can be custom cut to your specific requirements.

NAIL GLIDES

PAGE 23-28

At FCI we carry an extensive line of nail glides to cover all your needs. For more than 20 years we have been manufacturing nail glides from wear resistant plastics with numerous bases such as metal, felt, PTFE, rubber etc. Our welding process ensures that our felt bases will not peel off in almost any application. These nail glides are available in many sizes, shapes and colors. Additionally we can custom manufacture these glides to your specific needs.

FELT GLIDES

PAGE 29-32

FCI has developed a process of co-molding felt to plastic which creates an exponentially stronger bond than traditional glues. This bond will not be weakened by temperature or humidity. These felt based glides are available in many styles to fit all types of wood, metal or plastic furniture. Designed to protect all types of smooth flooring, the felt glides allow furniture to easily slide over many non-abrasive surfaces.

CAP GLIDES

PAGE 33-36

Cap glides are designed to fit over tubing and are available in a vast array of sizes and materials. These outside fitting caps/glides can be molded from PVC, TPR, PP and come in light and heavy duty specifications for all types of applications. These glides will protect all types of flooring from hardwood to slate and tile. These glides come in white, black, grey and clear. FCI is capable of matching any Pantone colour.

FLOOR PROTECTORS

PAGE 37-38

FCI's easy-to-use Floor Protectors can be placed under the legs of furniture to prevent both floor and carpet damage. They can also be used to prevent casters from rolling.

SWIVEL GLIDES

PAGE 39-46

FCI has one of the most extensive selection of swivel glides in North America. We carry swivel glides for almost any size and shaped tubing in both imperial and metric. Our basic swivel glides have been engineered to withstand a 300lb pull-out test when properly installed in the correct size tubing. Swivel glides are available in numerous styles and shapes with various types of bases from plastic to metal to felt and come in all types of finishes. FCI can also custom manufacture swivel glides to your specific needs & requirements.

LEVELERS

PAGE 47-60

For over 25 years, FCI has been the primary supplier to some of the largest furniture manufacturers in the world. From residential to commercial, office furniture to store fixtures, appliances to upholstered goods, we have the leveller/adjustable glide you need. We can manufacture almost any size in both imperial and metric. Bases are available in all types of plastics from nylon to poly to metal in sliding PTFE, non-slip TPV or non-marring felt. The leveler studs are made from steel and zinc plated to resist corrosion. Studs can be fixed or swivel and custom fabricated to any configuration you may require.

THREADED METAL ADAPTERS

PAGE 61-64

Threaded metal adapters eliminate the expensive process of welding female threaded inserts into tube ends. Once installed these adapters are virtually non-removable creating a permanent re-usable thread for levellers etc. Available in both imperial and metric for almost any size round, square and rectangular tubing, these adapters come in many designs for light duty and heavy duty applications. Additionally, they can be threaded for levellers or non-threaded for friction fit caster stems.

INDUSTRIAL LEVELERS

PAGE 65-68

Industrial levellers are designed for heavier applications such as machinery or over-sized equipment and furniture. These robust levellers have either plastic bases made from PA66 nylon or high strength carbon steel. Industrial levellers are designed to absorb machinery vibration and can come with non-slip pads to keep heavy structures stable.

KNOBS, LEVERS & HANDLES

PAGE 69-70

FCI has a very broad selection of control knobs for every application. From T-style to 3, 4 & 5 point star knobs in varying types of plastics. These knobs come with studs or internal threads in both imperial and metric. Knobs can be over-molded with a soft touch material to create a comfortable, non-slip gripping surface. If you don't see what you need in our catalog please inquire as we have many styles not in this catalog. FCI is capable of custom manufacturing any control knob or handle you may require in an assortment of materials and sizes.

INSERT GLIDES & BUMPERS

PAGE 71-80

Insert glides are designed to fit inside your tubing leaving a practically invisible closure. We have glides for almost every size and shaped tubing whether it's round, square, oval or rectangular. Also in this section you will find bumpers and plastic threaded adapters for any application. FCI will also custom mold any insert glide from a multitude of materials in any color.

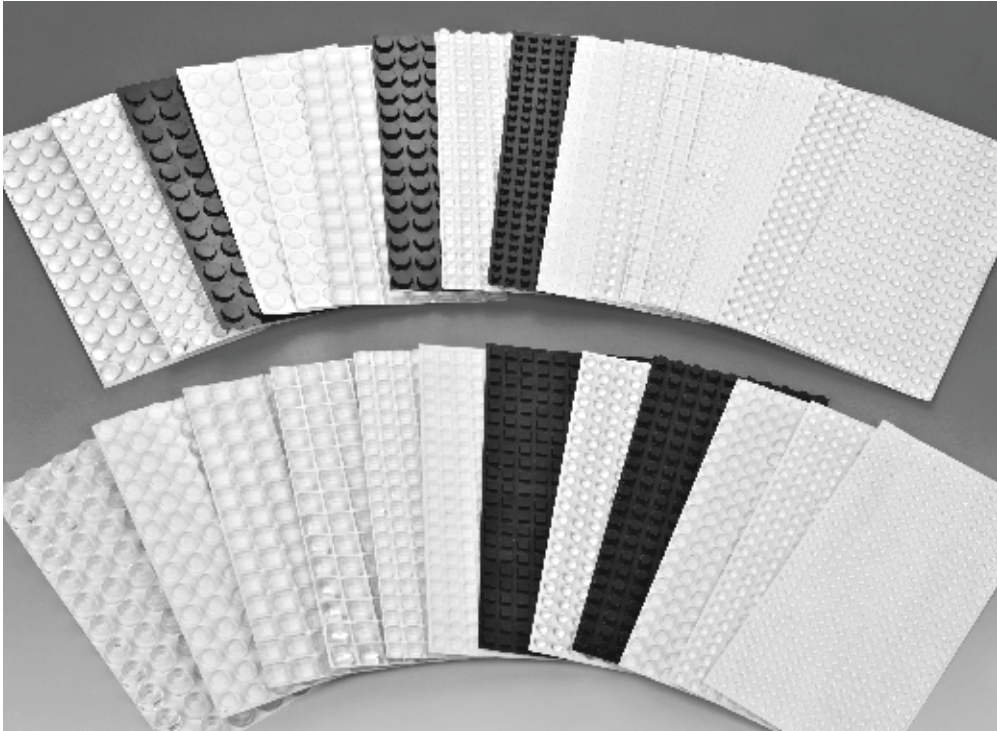

CUSTOM MOLDING & DIE-CASTING

PAGE 81-84

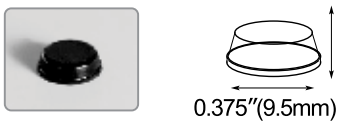

FCI has become one of the largest suppliers of custom molded plastic parts and zinc / aluminum die-cast parts. From as low as \$1000.00 we can create a custom tool to produce your uniquely designed part for any application. You design the part and send us a drawing, sketch or sample of what you want and we will make it. Small minimum quantities allow anyone to make custom parts. Pre-production samples are supplied for approval prior to any production run. Parts can be molded from any plastic material or die-cast from zinc or aluminum. FCI can also supply stamped metal parts from CRS or any other sheet metal material upon request.

FCI LEVELER INNOVATION

FCI's innovative manufacturing techniques utilize a variety of non-traditional materials. Our Levelers:

- a) Allow furniture to slide smoothly on multiple flooring surfaces
- b) Prevents scratching of wood flooring
- c) Remains durable in very low temperature environments

Our innovative manufacturing techniques utilize a variety of non-traditional materials.

Base Material	Example	Features
PTFE (Teflon)		Easily slides over most surfaces. Very low friction co-efficient. Corrosion and temperature resistant.
Plastic Alloy		An Engineered plastic designed to slide over most surfaces. It is durable and wear resistant.
UHMWPE		Similar to Teflon glides but more affordable.
Injection Felt		Felt base is co-molded to plastic base to protect hardwood and laminate flooring.
Low Temperature Resistant Nylon		Durable, wear resistant nylon base. All purpose and long lasting for all applications.
TPV – Non-slip		Non-slip “TPV” base for all applications requiring non-slip. This material is environmentally friendly and operates well between -60°C to 135°C

INTRODUCING OUR BASE-SWITCHABLE LEVELER

FCI's Base Switchable Leveler offers four major base options:

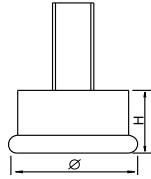

- 1) Metal Base: for stone and cement surfaces
- 2) Teflon Base: for carpet and wood surfaces
- 3) Felt Base: for wood and ceramic surfaces
- 4) Nylon Base: for wood, ceramic and carpet surfaces

The base can be installed on the upper portion (threaded stud + plastic cover) in seconds. Using this method, we can build and ship our Levelers efficiently according to our customers' needs. Additionally, if our customer purchases bases and upper parts from us, they can customize their own Levelers to suit the needs of their clients.

EXCEEDING EXPECTATIONS

Since FCI Molded Products amalgamation into The Accurate Group of Companies in 1990, we've always gone the "extra-mile" for our customers. We provide quality products, competitive pricing and responsive, knowledgeable staff who know how to keep your business moving.

FCI has supplied caps, glides and levelers on rapid turnaround to the furniture industry. Now one of the largest stocking distributors in Canada, our inventory is constantly expanding. We manufacture thousand of parts in plastic, steel, zinc and aluminum in an array of colours and finishes for multiple industries including; automotive, appliance, furniture and medical. In stock and on time, FCI is committed to providing quality goods and service at a competitive price.
